

Pete Ricketts, Governor

## ADDENDUM ONE QUESTIONS and ANSWERS

Date: December 11, 2015

To: All Bidders

From: Nancy Storant, Buyer  
AS Materiel State Purchasing Bureau

RE: Addendum for Request for Information Number OCIO112415  
to be opened December 22, 2015 at 2:00 p.m. Central Time

### Questions and Answers

Following are the questions submitted and answers provided for the above mentioned Request for Information. The questions and answers are to be considered as part of the Request for Information. It is the Bidder's responsibility to check the State Purchasing Bureau website for all addenda or amendments.

<u>Question Number</u>	<u>RFI Section Reference</u>	<u>RFI Page Number</u>	<u>Question</u>	<u>State Response</u>
1.			Can you please provide the funding source for the RFI (#OCIO112415) for Imagery Data Acquisition and Imagery Mapping/Hosting Services project?	No specific funding sources have been identified at this time. Information obtained in this request will be used towards the development of a business plan. It is through this process of developing a business plan that funding sources will be identified.
2.			Do you have an estimated project cost for this?	The purpose of this RFI is to obtain estimated project costs.
3.			Does the agency have a timeframe for which they would like to acquire a solution?	A timeframe will be determined during the business planning phase. Information needs to be obtained in this request prior to the development of a business plan.
4.			Can you provide the <a href="#">RFI (OCIO LiDAR)</a> respondent names?	Proposals were submitted by the following: <ul style="list-style-type: none"> <li>• Surdex Corporation</li> <li>• Merrick &amp; Company</li> <li>• The Sanborn Map</li> </ul>

Materiel Division • Marilyn Bottrell, Administrator

				<p>Company, Inc.</p> <ul style="list-style-type: none"> <li>• Fugro EarthData, Inc.</li> <li>• McKim &amp; Creed, Inc.</li> <li>• Aero-Metric, Inc. (dba AeroMetric)</li> <li>• GMR Aerial Surveys, Inc. (DBA Photo Science)</li> </ul>
5.			<p>The goal of RFI (#OCIO112415) is essentially the same as the OCIO LiDAR RFI, correct?</p>	<p>The goal of this program is to develop a sustainable and reoccurring Statewide Imagery Program for Nebraska. Imagery and LiDAR have different data acquisition requirements and deliverables. This RFI outlines the necessary information we are requesting to support our imagery needs. You can also review the NITC Imagery Standards (NITC 3-204 Imagery Standards) are located at <a href="http://nitc.ne.gov/standards/3-204.html">http://nitc.ne.gov/standards/3-204.html</a>.</p>
6.			<p>What is the role of the Nebraska Geography Information System (GIS) Council and the GIS project at this point? I believe they were formed to assist with this GIS project and it looks like the Nebraska Information Technology Commission is the lead on the project, is that correct?</p>	<p>The GIS Council is the lead on this initiative. They are preparing a business plan for the acquisition, maintenance, and distribution of a current, high-quality, statewide imagery dataset for the Nebraska Statewide Imagery Program. This program is identified as a strategic initiative action item for the Governor's Statewide Technology Plan.</p> <p>The GIS Council was formed by statute to facilitate the acquisition of GIS/geospatial technology at all levels of government and make recommendations to the Legislature for program initiatives and funding. The GIS Council also serves as an advisory council to the Nebraska Information Technology Commission for planning and recommendations to specialized needs of GIS/Geospatial technology. The State of Nebraska, Office of the CIO (OCIO) supports the GIS Council by providing coordination and procurement functions for the Nebraska Statewide Imagery Program as it moves forward.</p>

7.	II. B.	4	Item II-B indicates that an RFP will not necessarily follow from the RFI. If/when the RFP is subsequently issued, will it be open to the vendor public through public advertisement and made available to all via the various bid services that are used by the vendor community?	It will go through the proper procurement methods such as a RFP process. This process is subject to policies and standards set through the State of Nebraska.
8.			Is there an incumbent contract for this project, or is this a new initiative?	This is a new initiative.
9.			Additionally, has funding been secured? If so, how much does the State anticipate spending on this project? Any information would be appreciated	No specific funding sources have been identified at this time. The purpose of this RFI is to obtain estimated project costs. Information obtained in this request will be used towards the development of a business plan.
10.	Section III	8	The RFI states "The larger municipalities would like to consider a two-year rotation..." Can you define what the state considers "larger municipalities" for the context of this project?	We consider larger municipalities greater than 5,000 total population. Some of these cities include the Omaha area, Lincoln area, Grand Island, Kearney, Scotts Bluff, Gering, North Platte, Hastings, Norfolk, Columbus, Fremont, Wayne, South Sioux City, Seward, and York.
11.	Section III	12	Table A indicates the use of "2007 HARN". Please confirm the use of the 2007 rather than the latest HARN data available.	We reference our NITC Imagery Standards (NITC 3-204 Imagery Standards) are located at <a href="http://nitc.ne.gov/standards/3-204.html">http://nitc.ne.gov/standards/3-204.html</a> .  1.2.7 Projection and Datum Imagery for the project will be referenced to the North American Datum of 1983 (NAD83) using the 2007 HARN adjustment, and the North American Vertical Datum of 1988 (NAVD 88) with the latest ellipsoid and Geoid09 adjustments. Imagery shall be oriented to the appropriate Nebraska State Plane using U.S. Feet.

This addendum will become part of the proposal and should be acknowledged with the Request for Information.
